

# Be Aware!

Cyber Criminals are using Fake Job Scams to Target Applicants' Personally Identifiable Information. Scammers advertise jobs the same way Rita Staffing and other legitimate employers do: Online, in ads, on social media and various job sites.

They promise you a job, but what they want is **your money** and **your personal information**.

1. Never wire transfer money to a prospective employer.
2. Never send money for equipment, office supplies etc. in order to get job and work.
3. Legitimate companies will never ask for personal identifiable or bank information BEFORE hiring employees.
4. If the job seems too good to be true, it probably is.
